

## Frequently Asked Questions

**Q:** What material is ArborGard+<sup>®</sup> Tree Trunk Protector manufactured from?

**A:** ArborGard+<sup>®</sup> Tree Trunk Protector is manufactured from recycled polyethylene, with 25% post-consumer recycled content.

**Q:** How will ArborGard+<sup>®</sup> Tree Trunk Protector perform in harsh weather conditions?

**A:** ArborGard+<sup>®</sup> Tree Trunk Protector is durable and is designed to not lose its shape in hot or cold weather climates.

**Q:** Why is ArborGard+<sup>®</sup> Tree Trunk Protector manufactured in a round tube shape?

**A:** ArborGard+<sup>®</sup> Tree Trunk Protector is manufactured in a round tube form and stays round, unlike other designs that are made flat and then rolled. The round tube design allows ArborGard+<sup>®</sup> to naturally conform around the base of the tree.

**Q:** Does ArborGard+<sup>®</sup> Tree Trunk Protector need adjustment as the tree grows?

**A:** Once uncoiled and placed around the base of the tree, tapered end down, ArborGard+<sup>®</sup> Tree Trunk Protector will automatically expand as the tree grows.

**Q:** Why use ArborGard+<sup>®</sup> Tree Trunk Protector?

**A:** Using ArborGard+<sup>®</sup> Tree Trunk Protector on trees will protect against bark damage from gardening equipment and tools, rodents and other small pests, and shield tree trunks from damaging string trimmers.

**Q:** Why does ArborGard+<sup>®</sup> Tree Trunk Protector have slots?

**A:** The slots manufactured in ArborGard+<sup>®</sup> Tree Trunk Protector allow the trunk to breath as well as protect against insect infestation and bark rot.

**Q:** What size trees should ArborGard+<sup>®</sup> Tree Trunk Protector be used for?

**A:** ArborGard+<sup>®</sup> Tree Trunk Protector is designed to fit trees with trunks of 4" diameter or less. However, with its unique expansion tabs that lock in the slots, two or more coils can be combined to accommodate trees larger than 4" in diameter.
